

MUHAMAD YAZID ZINKY ARISONA

Back End Developer | RESTful API | Database & ORM Specialist

Bandung, Jawa Barat, Indonesia | yazidzinky98@gmail.com | <https://github.com/yazidzky> | www.linkedin.com/in/muhamadyazidzinkyarisona | <https://my-portofolio-muhamad-yazid-zinky-a.vercel.app/>

PROFESSIONAL SUMMARY

Current Informatics Engineering student with hands-on experience building **scalable RESTful APIs**, **SQL/NoSQL databases**, and full-stack web systems. Proficient in **REST API design**, **JWT Authentication**, and **ORM/ODM technologies** (Mongoose, Sequelize, Prisma). Proven track record delivering **5+ production-deployed back-end projects**, including an AI-powered API with **99.06% model accuracy**. Experienced leading teams in Agile environments through academic projects and robotics leadership.

TECHNICAL SKILLS

Back End Development (Intermediate): Node.js, Express.js, FastAPI (Python), **REST API Design**, **JWT Authentication**, **MVC Architecture**

Databases & ORM (Intermediate): PostgreSQL, MongoDB, **MySQL**, **Oracle SQL**, Mongoose ODM, **Sequelize**, **Prisma**; **Oracle Academy certified**

API & Real-Time (Intermediate): RESTful API (CRUD, versioning, error handling), **Socket.IO**, Postman, Thunder Client

Security & Auth (Intermediate): **JWT**, **bcrypt**, **Role-Based Access Control (RBAC)**, AES-256-GCM encryption

Version Control & Agile (Advanced): **Git**, **GitHub**, **branching & PR workflow**, **Scrum**, **sprint planning**

Front End & DevOps (Intermediate / Familiar): **HTML5**, **CSS3**, **JavaScript (ES6+)**, **React**, **Tailwind CSS**; **Vercel**, **Railway**, **CI/CD basics**

AI / Machine Learning (Intermediate): **Python**, **Sentence-BERT**, **TensorFlow**, **Scikit-learn**, integrating AI/ML into back-end systems

EXPERIENCE

Leader, Mechanical Robotics Division | Robotika UIN Bandung

March 2025 - December 2025 (10 months) | Bandung, Jawa Barat, Indonesia

- Introduced **sprint-based Agile task cycles** with weekly reviews and shared documentation to fix coordination gaps between sub-teams.
- Reduced integration mismatches by **~60%** and **delivered all mechanical subsystems on schedule across 3 project iterations**.

Member, Robotics Team | Robotika UIN Bandung

October 2024 - December 2024 (3 months) | Bandung, Jawa Barat, Indonesia

- Developed **firmware in C/C++** for microcontrollers (sensor reading, motor control, FSM logic) and collaborated via structured **Git version control**.
- Delivered a functional competitive sumo robot on a tight deadline.

PROJECTS

EduRate Platform - Higher Education Review & Rating System | Node.js, MongoDB

edu-rate-main-16in.vercel.app | github.com/yazidzky/EduRate-main

- Built a **RESTful API** with **Node.js/Express.js**, **JWT-based RBAC** (3 roles), and a **MongoDB + Mongoose** schema with analytics endpoints.
- Delivered a fully functional platform with **10+ API endpoints**, deployed on Vercel.

Ocean Blue - Real-Time Fullstack Progressive Web App | Node.js, Socket.IO, MongoDB, TypeScript

blue-ocean-main-lrwe.vercel.app | github.com/yazidzky/BlueOcean-main

- Designed an **event-driven architecture** with **Socket.IO** and offline sync via Service Worker, backed by structured **MongoDB** collections.
- Delivered a real-time chat/task app with **sub-100ms message latency** and full offline mode.

PELET App - AI CV-to-Competency Matching API | FastAPI, Python, NLP

pelet-app.vercel.app | github.com/Pelet-app/Model_AI

- Built a **FastAPI** back end serving a **Sentence-BERT** + **TensorFlow** model with clean REST endpoints and input validation.
- Achieved **99.06% accuracy** on 1,175 test samples, matching CVs to Indonesian National Work Standards (SKKNI).

EDUCATION

S1 Teknik Informatika (Informatics Engineering) | UIN Sunan Gunung Djati Bandung

September 2023 - Present | Bandung, Jawa Barat, Indonesia

- Coding Camp 2026 Cohort powered by DBS Foundation, an intensive program focused on software engineering and AI.
- Relevant coursework: Algorithms & Data Structures, Database Systems, Database Management, Object-Oriented Programming, Software Engineering, Distributed Systems, Computer Networks, Operating Systems, Agile Project Management.

ORGANIZATIONS & ACHIEVEMENTS

- Gold Medalist, **NICYMS 2026 - part of the team that developed** HalalChain, a blockchain-based (Base L2) halal product traceability system **supporting transparency and easier auditing across the halal supply chain.**
- Finalist, **Web Design Competition HIMIKA CUP PART-V, Universitas Dehasen Bengkulu (Nov 2024)**
- Best STA Proposal, AFL Winter Peak 2024, Delegate of AFL (Association For Leadership)
- Coding Camp 2026 Cohort **powered by DBS Foundation**

CERTIFICATIONS

- Database Design & SQL Programming - Oracle Academy
- Cloud & Generative AI at AWS - Dicoding
- Python Programming, Machine Learning for Beginners, Fundamental & Advanced Deep Learning - Dicoding
- Introduction to Generative AI & GenAI for Software Development - IBM SkillsBuild
- NanoConnect: React + Supabase + Serverless - Codepolitan

SOFT SKILLS

- Analytical Thinking - breaking down complex technical problems into structured solutions, such as designing database schemas and multi-role authentication flows.
- Problem-Solving - comfortable debugging and troubleshooting back-end systems and API integrations independently.
- Team Collaboration - experienced working across software and hardware divisions in robotics and application development projects.
- Communication & Leadership - led the Mechanical Robotics Division and coordinated weekly sprint reviews across sub-teams.
